

PTR RESIDENTIAL

> Residential and Ornamental

USPTM is a leading supplier of fencing framework to the residential market. We've built our reputation on producing the highest quality pipe and tubing products available, and the same quality that goes into our PT line of industrial and commercial grade products can be found in our PTR series for residential applications.

Superior Strength - PTR is fabricated with high yield strength of 40,000 PSI- the highest grade available in residential applications.

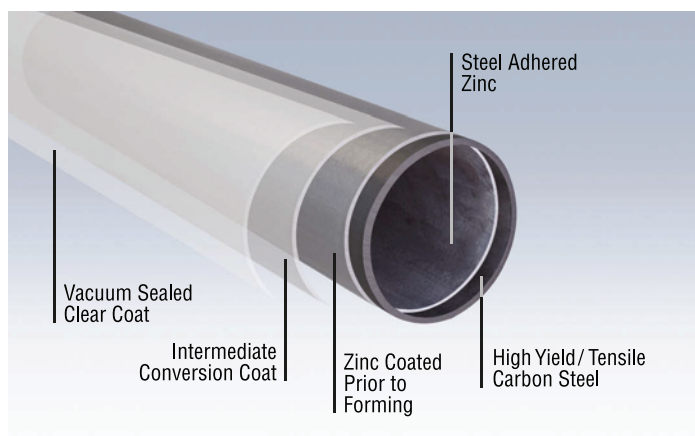

Superior Corrosion Resistance - The PTR series uses the same advanced inline triple coat protection process as our commercial grade PT line of products. This means that we can guarantee your residential customers the highest degree of corrosion resistance available. This process includes an initial zinc bath, an intermediate conversion coat and an organic clear top coat for maximum protection. I.D. is coated prior to forming.

Wide Variety of Styles and Sizes - PTR is available in round and square styles for a wide variety of applications.

- Round pipe and tubing is available from 16 to 18 gauge and in O.D. ranging from 1-3/8" to 2-3/8".
- Square is available from 14 to 16 gauge in sizes 2", 2.25", and 2.5".

Polyester Color Coat - The entire PTR series of USPTM products is available with our exclusive polyester color coat system. Colors can be custom tailored to meet your exact specifications in compliance with ASTM standard thickness of 3 mils.

Polyolefin Heavy Mil Color Coat - produced at 10 mils minimum thickness in compliance with ASTM F 1043.

Made in U. S. A. - All Residential tubing product from USPTM is manufactured in the USA.
